

HourGlass™

ONLY FROM BALLISTIC GLASS & ARMOR SOLUTIONS (BGAS)

At Ballistic Glass & Armor Solutions, we are committed and passionate about creating products that save lives and protect assets.

We are proud of our products, and we realize the critical role they play in protecting our customers.

Occasionally, there is an urgent need for these products that cannot be filled due to the long lead times involved in production of these specialized products, and we decided to fix that.

If you need protection and you need it fast, we are here for you.

BGAS now offers our emergency rush service called HourGlass™

With HourGlass™, we can produce custom made-to-order sizes of our level 1, level 2, and level 3 ballistic products and have them shipped and on their way to you within 48 hours or less.

HourGlass™ even includes holes and cut-outs, such as for speaker holes and passthrough trays.

So, the next time you find yourself needing some very specialized security glazing in a big hurry, call BGAS for a quote on our HourGlass™
